

ALTO CASE MANAGEMENT & LITIGATION SUPPORT

Today's successful law practice encounters work product in many different forms. Information relating to any specific matter may include scanned documents, electronic documents, e-mail, voice mail, or full motion video. The emergence of electronic signatures, filings, and discovery processes has increased the need for rapid, effective exchange, distribution, and management of information. Traditional document management systems are often positioned to address a limited area of focus such as litigation support, or simple administrative scanning and distribution, while overlooking critical information gathering, management, or storage and archival needs.

Technology has forever changed the practice of law and intensified the challenge to provide open and flexible content management systems that can easily be adopted across all business practices using common user interfaces and tools. As new content types appear they must be easily integrated with existing workflow. Information must be quickly published to traditional print media or should be easily available using web based tools. Effective content management is essential for successful collaboration between a law firm and its clients.

INTEGRATE INFORMATION EXCHANGE, DISTRIBUTION, AND PRESENTATION

UltraWare™ provides an end-to-end case management system addressing the content management requirements for law firms of any size or area of practice. Alto Case Management delivers information to any business area in its own descriptive profile, workflow, and format using a familiar web-based user interface. Information is captured, exchanged, managed, and published using a single integrated application suite.
