

Unmatched power and flexibility for document editing and production print make-ready

Alto Imaging Technologies Image Arranger is a powerful image capture and make-ready solution designed to increase productivity, and streamline production printing. Image Arranger includes an advanced set of tools to help you tackle even the most complex document composition. With Image Arranger, you can capture hardcopy, integrate or merge electronic documents, and perform last minute editing and revision, all while achieving the highest possible print quality.

Image Arranger includes WYSIWYG page editing, drag-and-drop document assembly, custom layout and impositioning, variable text and image overlay, and support for today's most sophisticated digital black and white and color printers, making this one of the most complete workflow solutions available.

Features and Benefits

- Streamline document assembly using a drag-and-drop, WYSIWYG, integrated workspace. Image Arranger is a complete application without requiring non-intuitive, slow-loading, 3rd party plugins.
- Advanced tools let you cut, crop, paste, resize, rotate, and perform a host of other editing tasks on selected pages, or an entire document.
- Shift, scale, and auto-shift give you precise control over image alignment and size.
- Easily split facing-pages, or printer spreads to create new layouts, or reuse content in some other manner.
- Create and insert tabs with multi-line text or images quickly with an easy-to-use tab maker.
- Add headers, footers, and page numbering, intelligently skipping tabs, and alternating placement for two-sided or tumble output.
- Select from several custom layouts including 2-up, 4-up, booklet, and multi-part forms. Print preview provides a document view reflecting layout to simplify proofing.
- Automate variable data and image overlay. Includes support for multiple variable regions, page control, and sequential numbering, making it easy to create forms and mail merge applications.
- In addition to standard Windows printing, Image Arranger supports driver-less printing via the native printing formats of selected output devices. Includes support for page-level media selection, and job-ticketing (templates) recall.
- Open and work with PDF, Postscript and Most Image Formats – combine different format documents into one.
- Serves as a standalone make-ready application or integrates with UltraPrint and UltraDoc to build a complete production-class digital print-on-demand system.

IMAGE ARRANGER

CAPTURE MANAGEMENT

- Any type of digital scanner or imaging device with a TWAIN interface can be used with Image Arranger.
- Powerful set of scanning clean-up and editing tools.
- Batch Acquire enables automated multi-document input directly to UltraDoc document database or to a folder of individual documents.

EASY IMPLEMENTATION

- Integrates with existing systems and business applications leveraging the value of existing documents and content.
- Rapid deployment maximizes return on investment.
- Minimal training requirements keep implementation costs low.

INPUT/OUTPUT FLEXIBILITY

- Open most image formats, PDF, postscript, HP-PCL directly – bring any Windows application file seamlessly into Arranger using Alto's TIFF creator and Port Monitor.
- Open a series of numbered files individually or all at once.
- File size is limited only by the amount of disk storage available using Arranger's Advanced Resource Management.
- Output to a wide variety of configurable image formats, including single and multi-image TIFF files, and PDF files using PDF creation tools.
- Automatically remembers print and layout settings via XML job ticket.
- Print to any printer on the network, with advanced printing controls for layout, page exceptions and finishing

ULTRAWARE™—THE POWER BEHIND THE PROCESS

The **UltraWare™** suite consists of the following core modules:

ARRANGER provides high speed, high volume, image capture, manipulation and sophisticated make-ready functionality

ULTRAPRINT manages high volume printing using a familiar explorer-like interface for easy assembly and output of even the most complex print job

ULTRADOC efficiently manages content of all types and integrates with all UltraWare applications. The included **ULTRAWEBSITE** provides use and management of content via the enterprise intranet or the Internet
