

## **Get ready to experience powerful, flexible, easy-to-use content management!**

*UltraDoc is an enterprise-level, information management platform ideal for collaboration and distribution of electronic documents. UltraDoc provides both middleware and front-end application layers creating an interface to an information store built on Microsoft SQL Server. UltraDoc lets you access individual content and manage information stores through an easy-to-use stand-alone client or Internet Explorer.*

*UltraWeb leverages Microsoft's ActiveX, and Active Server Page (ASP) technologies giving you remote access including the ability to view, print, and add or modify content of virtually any type. UltraWeb pages can easily be merged with your existing company web site running on Microsoft Internet Information Server (IIS). UltraWeb site pages are ready for your custom logos and personalized messages. Both UltraDoc and UltraWeb take advantage of Microsoft Windows Server and Microsoft SQL Server security models to provide user-level access control.*

*UltraDoc continues to set the standard for easy-to-use, scalable, content-neutral information management systems. Seamless integration with Microsoft Office applications and the other UltraWare applications provides the framework for enterprise content or records management, as well as specialized applications for sophisticated litigation support, copyright management, healthcare forms management, and complete print-on-demand solutions.*

### **Features and Benefits**

- Advanced Document Repository based on Microsoft SQL-Server and Internet Information Server
- Open Architecture and Access Model Facilitates Enterprise-Level Collaborative Usage
- Document/Bundle/Collection - three level hierarchy (analogous to document/folder/cabinet)
- Uses familiar Internet Explorer to Search, View, Print, Add or Replace Documents and Any Information about the Documents or the Hierarchical Structure (Bundles and Collections)
- Seamless Connectivity to the UltraWare Applications and to Microsoft's Office Suite
- Repository Documents can be in Native Format, Print-Ready Form or Any Digital Format including Multimedia
- Your content management system is not limited to proprietary formats and will not become obsolete as your information management and archiving needs change
- Flexible control of user access privileges and database security
- Complex Workflows can be Defined and Managed using SQL Stored Procedures, Triggers and ASP Scripts
- Integrates with Microsoft's New Reporting Services for Report Generation and Notification Services

## CONTENT MANAGEMENT

- Any type of digital content can be managed in the UltraDoc system. This includes the native format files used by any application as well as multi-media files.
- Content accessible using web-based interface with control over viewing, adding, updating, or local printing
- Reprint or reuse existing documents in multiple publications

## EASY IMPLEMENTATION

- Integrates with existing systems and business applications leveraging the value of existing documents and content
- Rapid deployment maximizes return on investment
- Minimal training requirements keep implementation costs low

## SCALABLE AND SECURE

- User-level security controls access to sensitive data and operations
- An unlimited number of users and groups can defined
- Access can be granted to specific types of content and/or to specific documents
- Built on the Microsoft Server components allowing for scalability to an organization of any size
- Relational database architecture based on the Microsoft SQL server platform using ODBC compliant data access

## ULTRAWARE™ —THE POWER BEHIND THE PROCESS

The **UltraWare™** suite consists of the following core modules:

**ARRANGER** provides high speed, high volume, image capture, manipulation and sophisticated make-ready functionality

**ULTRAPRINT** manages high volume printing using a familiar explorer-like interface for easy assembly and output of even the most complex print job

**ULTRADOC** efficiently manages content of all types and integrates with all UltraWare applications. The included **ULTRA WEB** provides use and management of content via the enterprise intranet or the Internet
